

Tuff Lids

Built to Flex. Built to Last. Built for You.

Durable

Thermoformed Strength

Built to last in the field—AGI Tuff Lids are thermoformed for flexibility and durability, featuring a reinforced hinge line that resists tearing and breakage—delivering a longer service life and fewer costly replacements. A longer lifecycle in the field means lower total cost of ownership and better value for your operation.

Efficient

Direct Savings

Fewer replacements, fewer service calls, and less downtime. A smarter investment with significantly reduced total cost of ownership.

Because our lids flex to absorb impact and resist weather-related failure, **you benefit with direct savings long-term with fewer replacements and fixes.** Invest in a lid that works as hard as your fleet.

Extreme

Weather Tough

Engineered to **withstand extreme heat, freezing temperatures, high winds, and UV exposure.** Tuff Lids resist warping, fading, and brittleness for long-term reliability.

Smart

Smart Hinge Design

Our smart hinge design is the most durable on the market. We offer interchangeable hinge lines in sizes 36x58 and 37x58. Hinge offerings can vary based on your needs: 4-hinge, 6-hinge, 3-hinge, 8-hinge.

Local

Made in the USA

Manufactured domestically for **quality assurance, consistent performance, and faster lead times.** Backed by complimentary warranties—because we stand behind every product we make.

Branding

Custom Color Options

Match your company colors, or municipal standards. Nearly **any color is available** for a clean, professional fleet appearance.

Real people. Real service. Real accountability.

Direct access to our sales team members, in-person visits, and hands-on support means faster answers, smoother transactions, and a partner who truly goes the extra mile. We promise real people and real service—no call centers or automated ordering systems.
